

Final Report of Science Lab

Akala Secondary School

Gorkha

The Science Laboratory project at **Akala Secondary School, Gorkha** has been successfully completed. The project team visited the store, purchased the required laboratory materials, and transported them to the school. The materials were then safely delivered to the science laboratory with the support of the students and school team.

The laboratory has been equipped with essential science materials and equipment to support practical learning. The students are actively participating in science practical activities and using the newly provided resources under the guidance of their science teachers.

The completion of the science laboratory has created a more practical and engaging learning environment for students. It will enable them to conduct experiments, understand scientific concepts through hands-on activities, and develop greater interest and confidence in science.

We sincerely appreciate the support of **TGUP** and the school management for making this project possible. The completed laboratory will provide valuable learning opportunities for students and contribute to improving the quality of science education at Akala Secondary School.
