

TGUP Project Summary

Science Lab Cabinets and Science Lab in a Box Good Samaritan High School Kyanukuzi, Uganda

Project Name:

Good Sam High School
New Cabinets and
Science Lab in a Box
(SLaB)

Project Location:

Kyanukuzi, Uganda

Project Summary:

Install new, locking cabinets and then fund materials, equipment and supplies to furnish the science lab.

Project Detail:

The science lab room is ready but in need of supplies.

Project Partner:

Good Samaritan
Ministries

Project Cost:

\$1,800 Cabinets
\$2,500 SLaB
\$4,300 Total

TGUP's **Science Lab in a Box (SLaB)** is a set of tools, equipment, instruments, and supplies needed to effectively teach laboratory science at the high school level anywhere in the world. It is customized to each nation and available at no cost to schools with requisite curriculum, infrastructure, and teaching competence in place.

TGUP, in partnership with GSM, will first install new, locking cabinets for safe and secure store of the equipment and supplies that will be furnished when the **SLaB** is delivered.

Good Samaritan High School has 305 students, 45 teachers, and one room used for science instruction.

All the students are taught Chemistry, Biology and Physics but have not been able to do the required experiments that would allow the students to continue to university studies.

The SLaB will address that need.
