

Final Report School Library Green Hills Academy

The School Library Project in Green Hills Academy was undertaken with the aim of providing students with a well-equipped library to enhance their learning opportunities, promote reading habits, and support academic growth. The project has now been successfully completed.

Books were purchased from the designated bookstore according to the school's requirement, including children's books, novels, fiction, non-fiction, reference materials, and educational resources. The purchased books were transported to the school premises safely. A dedicated library room was prepared and arranged for proper use. Students, teachers, and the school librarian actively participated in organizing and placing books in shelves according to different categories. Proper labeling and cataloging of books were completed to ensure easy access and management. Furniture such as bookshelves, tables and carpet were arranged to create a comfortable and learning-friendly environment. The school now has a fully functional and organized library. Students have access to a wide variety of books and resources. The library is expected to encourage reading habits, improve knowledge, and contribute to academic excellence.
