

Indonesia Latrines Project

for our school's ODFL Drive

- The village has no sewerage system. People have been pooping in the bushes since forever.
- This has gotten E.Coli in the water supply which is killing the children.
- The local people are providing all the labor, which keeps the cost down.
- Every dollar a student donates goes into this project.
- What we're really building is **ourselves**, and the realization that teenagers really CAN change the world.
