

Nepal, 2021 Aadarsha Science Lab in a Box

Aadarsha Saula School in Bungatami has 1,800 students and had 3 rooms for science classes but needed equipment. This SLaB installation means that the students at the school will now be able to do the practical work necessary to prepare for the national exams in Physics, Chemistry and Biology, and qualify to go on to a university.

Preparing slides in the biology lab

Viewing the prepared slides

Performing a chemistry experiment

Commemorative plaque
