

ODFL Project Summary

Electricity Project
Karat School, Ivory Coast

Project Name:

Electricity for KSP

Project Location:

Yopougon, Abidjan,
Ivory Coast, Africa

Project Summary:

Bring electricity to
school

Project Detail:

The Karat School
currently does not
have electricity or
running water

Project Partner:

Karat School Project
www.theksp.org

Project Cost:

\$720

ODFL with partner with the local community of Yopougon in the Ivory Coast and the Karat School Project organization to bring electricity to the Karat School. The school currently does not have running water or electricity. Once the electricity is installed, the school expects enrollment to increase.

With electricity, the school will also create programs that will serve over 500 children on a weekly basis that include homework support and computer classes.

The hope is that after the school has electricity, funding will be provided to bring water to the school. Once the school has both water and electricity, the school will be open to supporting the entire community with literacy, other educational and vocational training.
