

ODFL Project Summary

Water Project
Karat School, Ivory Coast

Project Name:

Water for KSP

Project Location:

Yopougon, Abidjan,
Ivory Coast, Africa

Project Summary:

Bring clean, running
water to school for
nutrition, education,
and gardening

Project Detail:

The Karat School
currently does not
have running water.
Water is within half a
mile of the school.

Project Partner:

Karat School Project
www.theksp.org

Project Cost:

\$2650

ODFL will partner with the community of Yopougon in the Ivory Coast and the Karat School Project organization to bring clean, running water to the Karat School. Water is currently delivered daily to the school by volunteer women carrying it on their heads (see photo above).

With running water, a daily meal will be cooked for the children. They will also be able to wash their hands, improving hygiene and reducing illness. In addition, water-based science lessons will be taught allowing the school to create programs that will serve over 500 children on a weekly basis. A first-ever garden can be grown.

ODFL helped bring electricity to the school earlier this year. With clean running water, the school will be able to function at full capacity. It will support the entire community with standards-based childhood programs, adult education, vocational training, and community service programs.
