

# Project Summary

## La Quebradita School and Latrines La Quebradita, Nicaragua

**Project Name:**

La Quebradita School and Latrines

**Project Location:**

La Quebradita, located 18 miles from Tipitapa

**NGO Partner:**

Seeds of Learning

**Project Cost:**

\$12,810

**Needs Assessment:**

- The children now go to school in a 40' cargo container.
- The existing latrine has collapsed.
- The existing room does not have enough space for all the children that would like to attend.
- The classroom will be used by the community after school hours.

TGUP, in partnership with Seeds of Learning, will fund the construction of a new classroom and two latrines for the community of La Quebradita. The local school currently consists of a 40' metal cargo container that has been converted into a classroom. There are 50 students who would like to attend but there just isn't enough space for them all inside the container.

The container gets very hot and does not provide a conducive learning environment. The school has two teachers that are provided by the Ministry of Education. The new classroom will be 10x6 meters including a separating wall so that two classes can be held simultaneously. Two latrines will also be built on site.

The community will contribute labor and quarry materials to level the land prior to construction. After school, the classroom will be used for community events, education, and health services.
