8.	Community Contribution (digging of the gutter)			-100,000
	Project management & reporting			177,712
TOTAL COST				1,066,712 (\$1,838)

Number of beneficiaries (Students): 662

Justification of the Drainage Gutter

The drainage gutter is needed to solve the poor drainage system of the school in general and to preserve the two classrooms we are currently renovating in particular. When it rains heavily, these classrooms are affected by running water which enters the class depending on the intensity of the rain. To solve the above problem, a good drainage gutter is needed in the school. This will help to prevent running water from entering the classrooms during heavy rains. This will also prevent the floors of the classrooms and the building in general from depreciating faster.
