

2022 End-of-Year Newsletter

This will be **TGUP's** best year ever!

We will complete 72 projects in nine countries. That's one every five days, somewhere in the world. Every one of those projects provides a better chance in life for the people they help.

It is so thrilling, we want you to see as many as possible (though, not 72). So, here is a super-fast run through of several of them. They give a great look and feel for what we do. Enjoy. And, Happy Holidays!

Our [Science Lab in a Box](#) enables world-class high school laboratory work in Biology, Chemistry, and Physics. They are booming...

in Kenya...

...and in Nepal.

The [Science Lab in a Box](#) was developed by the AP science faculty at Los Altos High School in Los Altos, California. Coming up next year...the Philippines.

These are students in a computer lab we installed in Guatemala. It's the first time they have ever touched a computer! Do they look interested?

Speaking of which, children need to play! Here are playgrounds we built this year, in...

Brazil...

...Nicaragua

...Nepal

...Guatemala

...and Kenya.

It's the most satisfying thing you can imagine to hear the children squealing with

delight as their bodies experience the joys of play.

Water is life. We built so many water projects this year, in...

Kenya...

...Nicaragua

...Nepal

...and Tanzania.

What else does it take to run a school? Well...

Latrines. We did lots of them...

Electricity....

Water...

Meal supplements....

And, of course, the classroom itself.

Here's the Before...

...and here's the After.

Where would you rather *your* children went to school?

This entire school project was funded by a group of [Kiwaniis clubs and their members](#) from the Sacramento, CA area.

TGUP's [Save a Girl™](#) program has helped more than [44,000 adolescent girls](#)

manage their period so they could stay in school. That includes 18,000 this year, up 80% from last year. They include kits distributed this year to girls in...

Kenya...

...Tanzania

...Nepal

...and India.

An acknowledgement of an important partner who helps us with [Save a Girl™](#)...

We also built a new Sewing Center to sew our [Save a Girl™](#) kits, in Tanzania. It will be finished in 2 weeks and will help tens of thousands of girls be able to stay in school. It will employ indigenous Maasai women as seamstresses.

This Sewing Center was funded by [a group of Rotary clubs](#) in the San Francisco Bay Area.

And, we opened 4 new [Save a Girl™](#) Sewing Centers in Nepal...

Soccer uniforms for a school team in Ghana...

Solar power for a school in Nicaragua...

Help for families at UC Davis Medical Center in California...

A new kitchen for a school in Guatemala...

Reduced-smoke stoves for Maasai bomas in Tanzania...

So many projects. We wish we could show you the other 47, but you get the idea. They're all like this. They're small, they're intimate, and they improve life chances for all the people in the communities they touch.

Since we started, in 2007, we've [completed almost 280 of these projects](#). Over their lives, they will help 1.7 million people have a better chance in life. This is what we do.

TGUP works because it is so simple. Everybody gives just a little bit—whatever is comfortable—and we use all of that money to help the poorest people in the world help themselves. It works. Here's the last picture for proof that it works:

This is how the world gets better, how life evolves, how the universe grows. Consciousness bootstraps itself. There's no other way.

We've raised money from private foundations that cover all of our operating costs, so 100% of every dollar you donate goes to a project like these.

Thank you for your part in making all of this possible. Happy holidays.

TGUP

P.S. If you are thinking of giving gifts for the holidays, please consider gifts from TGUP. They are from our partners in the field and help their local people. To see the gift catalogue, [click here](#).
