

Happy New Year! In the shortest way possible, here is a snapshot of what The Global Uplift Project did in 2022.

We completed 73 projects in 9 countries, up from 51 projects in 2021

- This brings to 283 the number of projects we've completed since our founding in 2007

100% of all individual, club, and school donations were spent on projects

- We can do this because we've raised funds from private foundations that cover all of our operating costs: website; literature; travel; software subscriptions; etc.

We made and distributed 18,701 *Save a Girl*™ (*SaG*) kits in six countries

- That's up 78% from 2021
- Keeping an adolescent girl in school for \$2 per year might be one of the highest returns on human investment in the world

Opened a new *SaG* sewing center in Tanzania, our first-ever there

Opened 4 new sewing centers in Nepal

Established new relationships and built projects with NGO partners in Tanzania, India, and Guatemala

Introduced our **Science Lab in a Box™ (SLaB)** to enable world class laboratory work for high school students in Biology, Chemistry, and Physics

- Many **SLaBs** were installed in Nepal and Kenya
- With enough of them installed, **SLaB** has a credible chance to raise the scientific IQ of the human race

Electricity

- Five separate solar power and electricity systems were installed in Kenya, Nicaragua, and Tanzania

Water projects

- Eleven (!) water projects in Nicaragua, Nepal, Kenya, and Tanzania

Playgrounds

- Seven playgrounds, in Kenya, Nicaragua, Brazil, Guatemala, and Nepal

What else?

- Classrooms, computer labs, kitchens, lots of latrines, medical supplies and services, vocational training, smoke-free stoves, and more

You can see vignettes of all of these projects in [this beautiful document](#). WARNING: Starting to read it is addictive because you see the immediacy, and the impact, of what we do. It is so inspiring!

Thank you for your help that makes all of this possible. We really CAN change the world. We ARE. **Please share with your friends.** That's the main way we grow.

Best wishes for the New Year!
